

Examples of `paresse` package usage.
 le T_EXnicien de surface
 2011-04-19

This file loads the `lmodern` package if it locally exists.

Caution: the `paresse` package is loaded with the option `tame` to show the usage of macro `\ActiveLaParsesse` and environment `ParsesseActive`.

With the macro `\ActiveLaParsesse` to make the § character active.

```
{\ActiveLaParsesse
\($a^{Sb}_{Sg}\) and also \($D^{Sa}_{Sd}\)
}
```

to obtain: α_γ^β and also Δ_δ^α

With the environment `ParsesseActive`.

```
\begin{ParsesseActive}\large
\begin{tabular}{*4{||>\ttfamily \S}c|c}||} \hline
a & $a & b & $b & g & $g & d & $d\\ \hline
e & $e & z & $z & h & $h & v & $v\\ \hline
...
X & $X & P & $P & S & $S & U & $U\\ \hline
F & $F & Q & $Q & W & $W & Z & $Z\\ \hline
\end{tabular}
\end{ParsesseActive}
```

\$a	α	\$b	β	\$g	γ	\$d	δ
