

Example for regstats

This example demonstrates the use of package `regstats`, v1.0f as of 2011/08/23 (HMM).

The used options were `proof=false, left=true, timer=true`.

`proof=false` is the default, but neither `left=true` nor `timer=true` are defaults (`left=false, timer=false` would be the defaults).

If ε -TeX is available with your L^AT_EX-distribution and you want to use it, uncomment the

```
%% \usepackage{etex}[1998/03/26]% v2.0
```

line in the preamble of this document.

(Also `\eTeX` instead of `$$\varepsilon$-TeX` would be available with it).

For more details please see the documentation!

Save per page about 200 ml water, 2 g CO₂ and 2 g wood:

Therefore please print only if this is really necessary.

For the resulting message, please compile `regstats-example.tex` and have a look at the end of the log-file.

Because the compilation time for this example is usually quite short, option `timer` is not demonstrated very spectacular.
